Setnor Auditorium Organ Specification

Organ

The auditorium's organ was a gift from John Crouse and was originally built by Frank Roosevelt in 1889. It was rebuilt by Estey Organ Co. of Vermont in 1924. In 1948, Arthur Poister joined the faculty of Syracuse University and sought to acquire new instruments by Walter Holtkamp of Cleveland, whose pioneering work led to the development of a new eclectic style of American organ that could handle a wide variety of 16th- to 20th-century repertoire. Holtkamp reused a substantial amount of pipework from the Roosevelt organ, giving this instrument even greater flexibility than most of Holtkamp's original instruments, with warm foundation stops suited to the performance of Romantic music, alongside the clear, bright voice of the neo-Baroque ranks. The new organ was dedicated on November 13, 1950, and has 3,828 pipes and 20 chimes.

Great

Quintadena 16
